## Iniziative ed Eventi

### Mission for Growth

#### **Business Partnerships in Andalusia and Extremadura Siviglia, 2-3 Aprile 2014 Merida, 4 Aprile 2014**

Enterprise Europe Network, su iniziativa del vice presidente Antonio Tajani, organizza due eventi di partnering con lo scopo di promuovere accordi tecnologici, commerciali e di ricerca tra PMI spagnole ed europee.

#### **Seville, 2-3 Aprile 2014**

##### **Aree tematiche:**

- Aerospazio
- Agrofood
- Biotecnologie e salute
- Turismo e Beni culturali
- Costuzioni e materiali
- Energia
- Industrie Creative
- Ambiente
- ICT
- Sicurezza

#### **Merida, 4 Aprile 2014**

##### **Aree tematiche:**

- Agrofood
- Biotecnologie
- Turismo e Beni culturali
- Energia
- ICT
- Trasporti e logistica

Per partecipare agli eventi è necessario registrarsi ed inserire il proprio profilo sul sito:  
<http://www.b2match.eu/m4q-spain-andalucia-extremadura>

##### **Le scadenze sono:**

19 Marzo 2014: registrazione ed inserimento dei profili  
26 Marzo 2014: richiesta degli incontri individuali

##### **La partecipazione agli eventi è gratuita.**

Finlombarda S.p.A., partner di Enterprise Europe Network, è a disposizione delle imprese lombarde per assisterle nelle fasi di preparazione e partecipazione agli incontri.

Per richiedere maggiori informazioni: [simpler2@finlombarda.it](mailto:simpler2@finlombarda.it)

---

#### **Brokerage event "Factories of the Future" during A&T 2014 Torino, 17 Aprile 2014**

La rete europea Enterprise Europe Network organizza un evento di brokeraggio tecnologico internazionale in occasione dell'ottava edizione di **Affidabilità e Tecnologie (A&T)**. L'evento si rivolge a imprese, università e Centri di Ricerca interessati a partnership tecnologiche sul tema "Factories of the Future", con un focus sugli Advanced Production Processes, in particolare:

- **Photonics;**
- **Advanced materials;**
- **Nanotechnologies/micro&nano electronics**

La nuova edizione di A&T si svolgerà nell'arco di due giorni, presso il Centro Congressi Lingotto Fiere di Torino.

Per iscriversi all'evento di brokeraggio "A&T" è necessario registrarsi on line attraverso il sito: <http://www.b2match.eu/at2014> (Sezione: "Registration" - indicando come "Support Office" di riferimento: IT - Finlombarda) e compilare un profilo tecnologico in inglese che verrà inserito sul catalogo disponibile online).

La partecipazione agli incontri è **gratuita**

Le scadenze previste sono:

**4 Aprile 2014:** termine per la registrazione e l'inserimento dei profili  
**4 - 9 Aprile 2014:** selezione degli incontri

Per richiedere maggiori informazioni: [simpler2@finlombarda.it](mailto:simpler2@finlombarda.it)

## Bandi per la ricerca

### Convegno LO STRUMENTO PER LE PMI E ALTRE OPPORTUNITÀ PER LE PICCOLE E MEDIE IMPRESE IN HORIZON 2020

Milano, 4 Aprile 2014  
Auditorium Testori – Palazzo Lombardia

Le PMI rivestono un ruolo strategico nel nuovo programma europeo per la ricerca ed innovazione Horizon 2020. In tutti e tre pilastri in cui si articola Horizon (Eccellenza della scienza, Leadership industriale, Sfide Sociali) le PMI possono giocare un ruolo. Indubbiamente la maggiore attenzione alla dimensione innovazione, l'incremento del contributo comunitario (che copre fino al 100% dei costi diretti) ed una semplificazione delle procedure rendono più attrattivo il programma alle realtà industriali anche di piccole dimensioni.

A ciò si aggiunge lo **strumento per le PMI**: una nuova misura semplificata articolata in tre fasi ed a cui può accedere anche la singola PMI, finalizzata a sostenere progetti di PMI innovative con forte potenziale di crescita e di mercato.

Le tre fasi prevedono un ordine crescente di complessità e di vicinanza al mercato:

- Fase 1: studio di fattibilità/business plan, ( contributo 50.000€)
- Fase 2: sviluppo del progetto di innovazione (contributo compreso tra 0,5 e 2,5 milioni di €)
- Fase 3: supporto alla fase di industrializzazione e commercializzazione

L'incontro del 4 aprile pv, cui parteciperà un rappresentante della Direzione Generale Ricerca della Commissione Europea, ha l'obiettivo di fornire oltre ad un quadro di riferimento complessivo, indicazioni operative per affrontare i bandi in corso ed in particolare lo "Strumento per le PMI".

Per maggiori informazioni e per registrarsi al convegno: <http://www.simplernet.it/eventi/horizonpmi>

---

### Sustainable Energy Europe Awards

La Commissione Europea invita le imprese che operano nei settori **dell'efficienza energetica, delle energie rinnovabili e della mobilità sostenibile** interessate ad ottenere un riconoscimento dell'Unione europea e la visibilità per i propri investimenti, a presentare progetti per i "**Sustainable Energy Europe (SEE) Awards**" in una delle seguenti categorie:

1. Communicating
2. Consuming
3. Learning
4. Living
5. Travelling

I progetti vincitori saranno premiati con un editoriale, una pagina web, la promozione attraverso la stampa e una produzione audiovisiva con i risultati del progetto.

La proclamazione dei vincitori verrà fatta a Bruxelles durante la **Settimana europea dell'energia sostenibile – 23 / 27 giugno 2014**. (<http://www.eusew.eu/>).

Per maggiori informazioni e sottoporre un progetto: <http://www.eusew.eu/awards-competition/about-awards-competition>

**Il termine per la presentazione delle domande è il 28 marzo 2014.**

---

### Ricerche Partner per Bandi Europei

**FONTE: ENTERPRISE EUROPE NETWORK**

#### Automation, Robotics Control Systems

#### **1) PS: WIDESPREAD-2014-1 TEAMING - Twinning between a Bulgarian and Western Centres of Excellence in Mechatronics and Machine Building (Ref. RDBG20140228001)**

A Bulgarian laboratory on Computer Aided Design and Manufacturing, at a leading Bulgarian university is preparing a proposal for the Horizon 2020 WIDESPREAD-2014-1 TEAMING call. The project aims to develop a long term cooperation between a Centre of Excellence in Mechatronics or Machine Building from a western country and the Bulgarian laboratory in order to establish such a centre in Bulgaria. The Bulgarian partner require a Center of Excellence on Mechatronics to complete the consortium.

## Electronic engineering

### **2) PS – Horizon 2020 ICT- Development of electronic paper applications (Ref. RDEE20140304001)**

An international consortium coordinated by an Estonian SME is looking for additional partners to a Horizon 2020 project focusing on novel electronic paper display applications. End-user partners are sought from various sectors, like for instance smart packaging, Point of Sales and Point of Purchase digital signage, and indoor or outdoor digital advertising. The partners are expected to specify, develop, test and validate product demonstrators based on flexible electronic paper displays. [Deadline for call: 23 Aprile 2015](#)

## Energy

### **3) PS: H2020 LCE 2 – 2014 - MIOffshore- Automated Manufacture and Inspection of Offshore Substructures and Holistic, Advanced Control Paradigms for Wind Energy Assets. (Ref. RDUK20140207006)**

An East of England based research centre is preparing a proposal for the Horizon 2020 LCE 2 – 2014 call. The project aims to develop means of robotically welding nodal joints which are required for jacket and tripod and floating platform solutions. They require an Offshore Wind Turbine Manufacturer and an Offshore Wind Turbine Developer to complete the consortium. [Deadline for call: 1 Aprile 2014](#)

### **4) PS: H2020 LCE 2 – 2014 (Challenge 4) - PowerStream- Development of a reliable system management tool for environmentally robust and powerful wave and tidal stream generators. (Ref. RDUK20140207001)**

An East of England based research centre is developing a proposal for the Horizon 2020 LCE 2 – 2014 (Challenge 4) call. The project aims to develop a reliable system management tool for environmentally robust and powerful wave and tidal stream generators. They require a number of partners to complete the project consortium (listed in partner sought). [Deadline for call: 1 Aprile 2014](#)

### **5) PS: H2020 – LCE 2 2014 Challenge 2 - CSPCheck- The Economic, Efficient Concentrated Solar Power Plant.(Ref. RDUK20140207003)**

An East of England based research centre is preparing a proposal for the H2020 LCE 2 – 2014 (Challenge 2) call. The project will develop a system around the two most widely used CSP plants, namely Parabolic Trough (PT) and Solar Tower (ST) and provide a comprehensive evaluation of each system by means of a multi-criteria analysis. Four partners are required to complete the project consortium (see partner sought section). [Deadline for call: 1 Aprile 2014](#)

### **6) Development of advanced energy storage systems based on hybrid ion-Li supercapacitors (Ref. RDES20140221001)**

A Spanish research centre is preparing a proposal for the H2020 NMP 13 – 2014 call. The project aims to develop advanced energy storage devices based on ion-Lithium hybrid super capacitors for their final application into different systems such as auxiliary power units in electronic devices, hybrid electric vehicles, power distribution lines (voltage compensation) and remote/decentralised sources (renewable): They look for partners with expertise in the sectors to establish the consortium. [Deadline for call: 6 Maggio 2014](#)

### **7) Dutch company seeks partners for their Deep Triassic Geothermal Energy project (Ref. RDNL20140225001)**

This Dutch R&D project is focused on a deep geothermal project in The Netherlands. A project in which a geothermal well to the Trias layer (4 km deep) will be realized. This Dutch company is preparing a submission for a contribution from the European Horizon 2020 program (specifically, the LCE-02-2014 call). They seek for partners that are interested in a partnership for this project. This Dutch company is looking for partners who operate or do research in the field of geothermal energy. [Deadline for call: 1 Aprile 2014](#)

## Energy - Building

### **8) H2020 EeB-05-2015: Innovative design tools for refurbishing of buildings at district level - Partner Search (Ref. RDUK20140205001)**

A Midlands UK based University is leading a project to develop an Indicator System that will inform the choice of Intelligent Building Technologies used especially for building refurbishments based on their corresponding sustainability value in terms of energy efficiency, cost reduction and user comfort. It is highly desirable that an indicator system that evaluates both Building Intelligence and Sustainability in existing buildings should be developed. [Deadline for call: 9 Dicembre 2014](#)

### **9) Partner Search - H2020 - EeB-07-2015: New tools and methodologies to reduce the gap between predicted and actual energy performances at the level of buildings and blocks of buildings (Ref. RDUK20140205003)**

The monitoring of real energy use in energy-efficient buildings frequently shows major differences with respect to the predicted performance. This is even worse if a set of interacting buildings is considered. It is therefore important to capture the real complexities of the energy performance of the actual buildings and districts. In addition, effective methodologies for the correct understanding of user behaviour need to be addressed. The UK based University now seeks research cooperation. [Deadline for call: 9 Dicembre 2014](#)

## Energy – Water

### **10) URGENT: SMEs to analyze the international market of energy and water technologies. (Ref. RDES20140206001)**

A Spanish research centre related to water is preparing a H2020 project proposal. The proposal is a targeted Collaborative Project in water-energy nexus, focused on rural water, that aims to promote the partnership between EU enterprises and enterprises in third countries. The centre is looking for SMEs to analyze the international market for innovative products in the EU related to energy and water savings in irrigation. [Deadline for call: 8 Aprile 2014](#)

**11) PS: H2020 Water 1a-2014 Int'l Market replication of european innovation in water and energy management (Ref. RDES20140211001)**

A Spanish research centre related to water is preparing a H2020 project proposal. The proposal is a targeted Collaborative Project in water-energy nexus, focused on rural water that aims to promote the partnership between EU enterprises and enterprises in third countries.

The centre is looking for innovative European SMEs experience in renewable energy directly applied to irrigation pumping. Deadline for call: 8 Aprile 2014

## Health

**12) Innovative technology for the storage and transportation of cell types for use in 3D printing (Ref. RDUK20140122001)**

A UK university as part of a European consortium is seeking industrial partners with interests in ink-jet printing, tissue-based therapies or medical devices to help co-develop a new technology for the storage and transportation of cells. The cells types are hoped to be stored for up to two weeks, for use in 3D printing to create tissues. They are seeking research partners for a future H2020 bid, for technical cooperation agreements. Deadline for call: 1 Giugno 2014

**13) Partner Search for H2020 HEALTH: Effectiveness of physical exercise in the treatment of depression in older people.(Ref. RDES20140203001)**

A Spanish Regional Health Service looks for partners for a H2020 project dealing with the effectiveness of physical exercise in the treatment of depression in older people as an alternative to antidepressant drugs in the field of primary care, to be submitted to H2020-PHC-17-2014 or H2020-PHC-22-2015. Research groups related to primary health care with clinical experience are sought, primarily to conduct clinical trials with older people in primary care centers, according with the project idea. Deadline for call: 14 Ottobre 2014

**14) Horizon 2020: Nanoencapsulation of new molecules with neural activity provided by a pharmaceutical SME (Ref. RDIT20140218004)**

A pharmaceuticals small or medium enterprise (SME) and a pharmacology research group (University) are sought for a project idea consisting in the development new formulations based on nanoparticles for the treatment of neurodegenerative pathologies (e.g. multiple sclerosis). The final goal is the obtainment of a new product constituted of nanoparticles containing the SME molecule suitable for the pharmaceutical market. Deadline for call: 14 Ottobre 2014

## ICT

**15) H2020 - ICT-18-2014 : Internet platform to support creative visual computing and video content production (Ref. RDDE20131211001)**

A German research institute suggests a concept for a project proposal under ICT18 call: Support the growth of ICT innovative Creative Industries SMEs. It envisages to establish an internet-based ICT environment for user-centered analysis and augmentation of videos to support generation of new video content. They look for innovative SMEs involved in video content production or users of new video content to contribute with technical tools and user requirements. Deadline for call: 23 Aprile 2014

**16) Research and implementation of forecasting algorithms to identify in real-time trends and anomalies in sensor's data readings (Ref. RDBG20140203001)**

Bulgarian company is actively working on developing platform for SME companies that helps them predict and prevent failures in the equipment based on data from existing sensor networks. The goal of the project is to identify the proper technology stack, to develop numerous fast for execution algorithms on top of that stack that use minimum possible computational power and memory. The company looks for research and industry partners for submitting proposal under relevant Horizon2020 calls. Deadline for call: 23 Aprile 2014

**17) H2020:Software for the management of requests in public sector (Ref. RDGR20140204002)**

A Greek SME active in ICT sector is interested in submitting a project under the call "ICT-enabled open government". The project aims to develop a web/mobile application that will simplify the processes of public authorities in the areas of obtaining information and managing requests. The company is seeking for partners providing services to citizens and is willing to exploit the system as well as research institutes/enterprises which will examine the difficulties that citizens face. Deadline for call: 29 Aprile 2014

## ICT - Health

**18) Software for the creation of customized recipes & menus based on the personalized characteristics of each user (Ref. RDGR20140204001)**

A Greek SME active in ICT sector is interested in submitting a project under the call "Self management of health and disease: citizen engagement and Health", PHC-26-2014. The project aims to design and implement a nutrition & cooking application capable to provide personalized recipes and menus to users, according to their health condition. The Greek company is looking for a partner from Central or Northern Europe, experienced in project promotion & dissemination activities. Deadline for call: 15 Aprile 2014

## ICT - Security

**19) H2020: Notification of citizens and authorities about local incidents through social media (Ref. RDGR20140204003)**

A Greek SME active in ICT sector is interested in submitting a project under the call FCT-10-2014. The project aims to implement an urban security platform through which authorities will post customized alerts to social media whereas citizens

will report significant incidents that they witness. Partners involved in urban security are sought (i.e. police) and experts in software for extracting patterns from images/videos. [Deadline for call: 28 Agosto 2014](#)

## ICT - Textile

### **20) H2020-ICT-15-2014: Smart underwear technology – Smaut (Ref. RDHR20140210001)**

A Croatian company which is one of the leading vendors for the implementation of analytical systems and strategic ICT consulting in South East Europe is looking for a project partners in Horizon 2020 ICT-15 call ("Big data and Open Data Innovation and take-up"). Project idea is to bring smart textile technology to everyday use and test it in areas of healthcare and sports. The company has previous experience and participation in EU tenders - Eureka and 7th Framework (FP7) programme. [Deadline for call: 23 Aprile 2014](#)

## ICT – Tourism

### **21) Development of a decision-making tool for the evaluation of tourism destinations (Ref. RDGR20140212001)**

A Greek ICT company specializing in the development of mobile applications for tourism, is looking for partners to submit a proposal for H2020-ICT-18-2014. The aim of the project is the development of an integrated IT tool for the evaluation of different travel destinations around the world based on personalised quality criteria. Research and academic organisations are sought for building a competitive consortium. [Deadline for call: 23 Aprile 2014](#)

## Material - Waste

### **22) PS-H2020-WASTE-6-2015: BIOWASTE2PRODUCT – Searching biowaste products and by-products (Ref. RDES20140214001)**

A Spanish Research Centre is preparing a project proposal for the call H2020-WASTE-6-2015 with the aim of finding alternative environmentally friendly uses of a large amount of materials that today are being obtained from biowaste that cannot be used in agriculture, as they come from non-selected organic wastes. End users companies to test and implement new materials, as well as SMEs to characterize and valorize the waste are sought to complete the consortium. [Deadline for call: 16 Ottobre 2014](#)

## Mobility

### **23) Electric Mobility in Norway is looking for partners to "Green vehicle 2014" call. H2020-GV-2014 (Ref.RDNO20131128001)**

The Client is a Norwegian industry cluster that cooperates and explores business opportunities within the electric vehicle market. The cluster are looking for international cooperation and are seeking partners for common projects. One actual arena is Horizon 2020 and "Green Vehicle 2014". The Cluster is currently establishing a test site to acquire knowledge and develop solutions to support electric mobility and where solutions can be tested in real-life settings. [Deadline for call: 28 Agosto 2014](#)

### **24) Development of a advanced prototype six legged locomotion system for use on subsea remote operated vehicles. (Ref. RDUK20140205004)**

A UK Based organisation is seeking a partner to join their Hexaterra project. The project aims to enable the ROVs (Remote Operated Vehicle) to walk along the seabed, over rugged terrains and offers numerous benefits over current systems mainly stability, the ability to traverse features such as steps & inclines and it should offer a high degree of manoeuvrability. The new partner will be the primary owner with rights to use and exploit the IP for the mechanical locomotion system itself. [Deadline for call: 31 Marzo 2014](#)

### **25) H2020:Software system for increasing knowledge of local authorities related to traffic and citizens' mobility (Ref. RDGR20140204004)**

A Greek SME of the ICT sector is interested in submitting a project under the call MG4-5,2015. The project will create a software system which will allow local authorities and citizens to enhance their interaction concerning the mobility of the later. The Greek company is looking for a universities able to process traffic data, traffic engineering partners for analyzing traffic models and local authorities for installing the system. [Deadline for call: 31 Marzo 2015](#)

## Water Treatment

### **26) PS: H2020 WATER-2015-DRYWATER – Dry anaerobic digestion of Waste Water Treatment Plants sludge. (Ref. RDES20140218001)**

A Spanish company is looking for partners in order to submit a proposal for H2020-WATER-1-2015-two-stage call. The main goal of this project is to develop a dry anaerobic digestion of sludge from waste water treatment plants to achieve a "pathogen free" sludge that might be a high quality fertilizer, while increasing the biogas production. Partners with experience in autotrophic nitrogen removal, biogas and processes control are sought. A coordinator is also needed. [Deadline for call: 16 Ottobre 2014](#)

**Per maggiori informazioni:**  
[simpler2@finlombarda.it](mailto:simpler2@finlombarda.it)

## Ricerche di Partner Tecnologici e Commerciali

### Profili di ricerca/offerta di nuove tecnologie

Presentiamo di seguito alcuni profili di ricerca/offerta di nuove tecnologie di recente inserimento nella banca dati della rete **Enterprise Europe Network**:

### Richieste di tecnologia

#### 1) Technical knowhow for manufacturing Gas Sensors (Ref. TRIN20130912001)

The Indian company is a Manufacturer of Gas and liquid analyzers used in Industrial applications. Currently the company imports sensors required in the gas analyzers. Due to high cost of import, they want to start manufacturing locally by collaborating with gas sensor manufacturers. Open for collaboration in the form of License and/or Joint manufacturing with companies having technical know how in gas sensor technology.

#### 2) New technologies and packaging for instant food (Ref. TRUK20140131001)

The UK branch of a large European food products company makes ingredients for home cooking incl instant and fast-cooking pasta and rice. They are looking for ingredients or technology that will allow for faster making and superior sensorial quality of instant food. Also, variable volume packaging, and novel flavour enhancers are being sought. The nature of the agreement will depend on the stage of development. The company can access global markets.

#### 3) Novel plastics and bio-based materials sought for the designer industry (Ref. 13 NL 60AH 3SSA)

A Dutch company is specialized in the implementation of recyclable and sustainable plastics and ecological friendly bio-based materials. Its ambition is to optimize the use of these novel materials for a variety of innovative processes and designer projects. The company is looking for new materials (e.g. novel plastics, polymers and bio-based materials) as well as processing techniques and is interested in technical cooperation with companies active in the development and production of novel mat

#### 4) Carbon fiber reinforcements postmaking process's cuttings (Ref. 12 LT 57AB 3R4L)

Lithuanian SME, manufacturer of carbon fiber reinforcements, is looking for the solution for the utilization or further appliance of postmaking process's cuttings. It is carbon fiber reinforcement's strips of different width (20 – 100 mm) and length (1 – 10 m). The SME is interested in license agreement, technical cooperation and/or commercial agreement.

#### 5) Manufacture of automobile top coat liquid paints (Ref. TRIN20140218001)

An Indian company, engaged in manufacture of coatings, metal pre-treatment chemicals, automotive and industrial paints, powder coating paints. is seeking technology collaborator (s) and joint venture partner for top coat paints, including coatings used in cathode electronic deposition (CED) process for automobiles. Joint development, commercial agreement with technical assistance and training are also sought.

#### 6) A Greek engineering company is looking for Biomass Processing Equipment in the field of gasification, pyrolysis and CHP. (Ref. TRGR20140211001)

A Greek engineering company acts as a technical consultant of major investors for the development of grid-connected biomass plants, each of 0.5 or 1 MWe. The company is interested in novel and industry-ready solutions for the thermochemical transformation of biomass feedstock either into combustible gases for power generation or into synthetic fuels. The company is seeking to establish a technical cooperation agreement and/or subcontracting with companies abroad.

#### 7) Technology for neutralization of industrial smell (Ref. 12 LV 58AD 3PH2)

Latvian SME, dealing with manufacturing and supply of air filters, and delivering services for improvement of microclimate in industrial premises, is looking for an innovative solution for neutralization of bad smells created in industrial processes. Company is looking for commercial agreement with technical assistance.

#### 8) M2M Platform for Wireless Communication Module for Monitoring and Service (Ref. TRDE20140124001)

A German SME, a well-known brand in the field of loading equipment, is looking for a wireless Machine to Machine (M2M) communication module for monitoring and service. The wireless communication module should be a standard one usable for other applications. The company is looking for a technical agreement (eventually based on exclusive license).

### Offerte di tecnologia

#### 9) Preclinical studies of drugs and disease models: studying cognition in animals with the state-of-the-art touchscreen approach (Ref. TOUK20140217002)

A UK biotechnology company has substantial experience of development and characterisation of genetically modified mice. Approaches ranging from highly translational touchscreen-based cognitive tests to in vitro electrophysiology and imaging of tagged proteins of interest will provide an unprecedented insight into brain disease mechanisms and mode of action of novel pharmacological entities. Developers of CNS drugs are sought for screening programmes under technical, service or R&D agreements.

**10) Fabrication and characterisation of silicon solar cells and modules (Ref. TOUK20140114003)**

UK SME manufacturer of silicon solar cells and silicon based specialist PV modules. Skills: Solar cells fabrication including wet chemistry, laser processing, diffusion, texturisation, and metallisation (including electroless plating). Full characterisation of solar cells. Significantly experienced in private and public funded collaborative R+D. This expertise is offered to interested parties for research, technical cooperation, manufacturing or joint venture agreements or subcontracting.

**11) Innovative and efficient antifungal composition for pharmacological and phytosanitary applications (Ref. TOES20140205001)**

A Spanish University has developed an antifungal composition based on combined use of chitosan together with inhibitors able to modify gene expression of specific molecular targets. This composition is harmless and inhibits efficiently growth of many fungal species (pathogens). Main applications are: pharmacology and agriculture, but it is also applicable in other sectors. Research group is looking for companies acquiring this technology for licensing agreement or technical cooperation.

**12) TV broadcasting builder tool for live streaming and video on demand files in the cloud (cloud TV) (Ref. TOES20140211004)**

Spanish engineering company, has developed an innovative builder tool for internet TV broadcasting. This solution allows users to create, in a very easy way, their own internet station for live streaming and video on demand files in the cloud (Cloud TV). The company is looking for commercial agreements with technical assistance.

**13) Ultraviolet(UV) Sensor and LED Devices Using GaN(gallium nitride) Materials (Ref. 13 KR 9A9C 3SGA)**

A Korean firm has developed UV sensor/LED devices based on GaN(Gallium Nitride) materials. The technology supports three different detection ranges, from 280nm to 400nm, while each detection range could be put into three types of applications; UV sensor component to detect UV region, UV meter to monitor UV intensity, and measurement of the level of UV exposure at a given site at any time of the day. The firm is searching partners for technical cooperation, manufacturing or commercial agreements.

**14) New microencapsulation technology for food, cosmetic, nutraceutical and pharmaceutical purposes (Ref. TOES20140213006)**

A Spanish consortium (two pharmaceutical companies, one technological centre and one university) has developed original microcapsules as well as a new and versatile microencapsulation technology for food, cosmetic, nutraceutical and pharmaceutical purposes. The technology, protected by international patent applications, is well proofed at lab and pilot scale and now it is being scaled-up for commercial and industrial purposes. The consortium offers license agreements to industrial partners.

**15) Technology of producing ceramic and graphite surface coatings on aluminium alloys (Ref. TOPL20130724004)**

Researchers from south Poland developed a two-stage method of producing surface coatings on aluminium alloys that may be used in tribological (working without greases) systems of machines and devices. The covered parts are of betted hardness and wear resistance. Scientists are looking for industrial partners from machinery field to sign manufacturing agreement or technical co-operation or R&Ds to sign research cooperation agreement.

**16) Novel Imaging Retinal Densitometer (Ref. TOUK20131216002)**

UK researchers have developed a retinal densitometer to detect Age Related Macular Degeneration at the earliest stages by measuring how the light sensitive pigments in the macula regenerate after exposure to light. The main advantages over current methods are the ability to test dark adaption at a number of wavelengths that can be determined by the operator and all the necessary sensors, instrumentation and analysis components are built into a single kit. A licensing opportunity is offered.

---

**Offerte e richieste di collaborazioni commerciali**

Presentiamo di seguito alcuni profili di ricerca/offerta di collaborazioni commerciali di recente inserimento nella banca dati di **Enterprise Europe Network**:

**1) A UK company is looking for suppliers of textile products - table linen, bed linen and towels. (Ref. BRUK20140207002)**

An SME in the North East of England is looking for suppliers of bathroom towels, bed linen and table linen suitable for commercial use in restaurants and hotels, via a contract laundry and linen hire service provider. Long term partnerships are sought with suppliers from all EEN countries to work under a services agreement or a distribution services agreement.

**2) Plastics recycling company requests suppliers (Ref. BRUK20140204001)**

A UK SME specialising in plastics recycling is looking for European suppliers of all types of plastic scrap from film to rigid materials in almost any form. They are looking for materials suitable for processing, preferably from industrial sources. The company has considerable experience of working in the plastics recycling sector and working with a range of commercial and governmental organisations.

**3) Croatian company is looking for suppliers of finished or semi-finished breadlike products (Ref. BRHR20131211001)**
