Iniziative ed Eventi

HORIZON 2020 Matchmaking ESOF 2014 Copenhagen, 26 giugno 2014

La rete Enterprise Europe Network organizza un **evento di brokeraggio** in collaborazione con [Vision2020](#) nell'ambito di [ESOF2014 COPENHAGEN](#) (Euroscience Open Forum).

L'evento offre ad aziende, università e centri di ricerca l'opportunità di incontrare potenziali partner per progetti e collaborazioni future. Il focus dell'evento di brokeraggio è dedicato al programma **Horizon2020**, ed in particolare ai bandi inseriti all'interno dei pilastri **Industrial Leadership** e **Societal Challenges**.

L'evento di brokeraggio è parte integrante di ESOF2014, è possibile registrarsi alla conferenza al seguente link:

<https://www.ereg.me/ehome/index.php?eventid=67941&>

dove sono indicati anche i costi di partecipazione.

E' tuttavia possibile partecipare solo al matchmaking con un **ticket d'ingresso valido solo per il giorno dell'evento (50 euro)**. Per partecipare è necessario registrarsi sul sito: <http://www.b2match.eu/esof2014>

Le scadenze previste sono:

24 giugno 2014: termine per la registrazione e la prenotazione degli incontri

26 giugno 2014: Matchmaking Event

L'evento si terrà presso la [sala Pompeii della Carlsberg Academy di Copenhagen](#).

Per maggiori informazioni: simpler2@finlombarda.it

LET'S MATCH 2014 Bologna, 1 ottobre 2014

In occasione di **LET'S 2014 – LEADING ENABLING TECHNOLOGIES FOR SOCIETAL CHALLENGES** (<http://www.lets2014.eu>) – la conferenza internazionale organizzata da CNR, APRE e ASTER che si terrà a Bologna dal 29 settembre al 1 ottobre 2014, Enterprise Europe Network organizza un evento di Business Matchmaking allo scopo di facilitare l'individuazione di potenziali partner internazionali per l'avvio di collaborazioni scientifiche per la presentazione di progetti di ricerca sulle calls di **Horizon 2020**.

Il focus dell'evento sarà rivolto in particolare alle tematiche del work programme **NMP – Leadership in enabling and industrial technologies – Nanotechnologies, Advanced Materials, Biotechnology and Advanced Manufacturing and Processing**.

Le imprese interessate possono registrare un proprio profilo sul sito:

<http://www.b2match.eu/letsmatch2014>

La partecipazione al Brokerage event è **gratuita**.

Gli iscritti avranno la possibilità di accedere gratuitamente alla conferenza solo nel terzo giorno (1 ottobre). Per accedere alla conferenza anche nelle altre giornate è necessario registrarsi sul sito www.lets2014.eu, dove è indicato anche il costo per la partecipazione.

Le scadenze previste sono:

12 settembre 2014: termine per la registrazione

22 settembre 2014: termine per la richiesta degli incontri

Finlombarda S.p.A., partner di Enterprise Europe Network, è a disposizione delle imprese lombarde per fornire assistenza nelle fasi di preparazione e partecipazione agli incontri.

Per richiedere maggiori informazioni: simpler2@finlombarda.it

Bandi per la ricerca

Horizon 2020: bandi aperti

Di seguito l'elenco delle call aperte con scadenza nel 2014. È possibile avere il dettaglio degli argomenti di ricerca di ciascuna call scaricando il documento completo al seguente link: <http://www.simplernet.it/ricercaeuropea/orientamento>

Societal Challenge

Europe in a changing world - inclusive, innovative, reflective societies

Call Title	Budget	Deadline
SC 6: Reflective Societies - Cultural Heritage and European Identities	€ 14 million	30/09/2014

Food security, sustainable agriculture, marine and maritime research, and the bio-economy

Call Title	Budget	Deadline
FOOD 2014 - Sustainable Food Security	€ 1 million	26/06/2014
FOOD 2014 - Blue Growth: Unlocking the potential of Seas and Oceans	€ 15 million	26/06/2014
FOOD 2014 - Innovative, Sustainable and Inclusive Bioeconomy	€ 24.5 million	26/06/2014

Health, demographic change and wellbeing

Call Title	Budget	Deadline
HEALTH 2015 - Personalising health and Care and Wellbeing (I stage)	€ 330 million	14/10/2014

Secure Societies

Call Title	Budget	Deadline
SECURITY 2014 - Disaster resilience: safeguarding and securing society, including adapting to climate change	€ 65.4 milioni	28/08/2014
SECURITY 2014 - Fighting against crime and terrorism change	EUR 34.81 milioni	28/08/2014
SECURITY 2014 - Border security and external security	€ 40.78 milioni	28/08/2014

Secure, clean and efficient energy

Call Title	Budget	Deadline
Energy 2015 - Energy Efficiency: PPP EEB and SPIRE Topics	€ 17 million	09/12/2014
Energy 2014 - Competitive Low-Carbon energy (I deadline)	€ 361.80 million	10/09/2014
Energy 2014 - Competitive Low-Carbon energy	€ 361.80 million	10/09/2014

Smart, green and integrated transport

Call Title	Budget	Deadline
Transport 2014 - Mobility for Growth	€ 558.50 million	28/08/2014
Transport 2014 - Green Vehicles	€ 159 million	28/08/2014

Excellent Science

European Research Council

Call Title	Budget	Deadline
ERC - Proof of Concept Grant	€ 15 million	01/10/2014

Future and Emerging Technologies

Call Title	Budget	Deadline
FETs 2014 - Fet Open - novel ideas for radically new technologies	€ 3 million	30/09/2014
FET Proactive - towards exascale high performance computing	€ 97.4 million	25/11/2014

Marie Skłodowska Curie Actions

Call Title	Budget	Deadline
MSCA 2014 - Individual Fellowships 2014	€ 240.50 million	11/09/2014
MSCA 2014 - Co-funding of regional, national and international programmes (COFUND)	€ 80 million	02/10/2014

Research Infrastructures (Including e-infrastructures)

Call Title	Budget	Deadline
ERI 2014 - Developing new world-class research infrastructures (different deadlines)	€ 82 million	02/09/2014
ERI 2014 - Integrating and opening research infrastructures of European interest	€ 140 million	02/09/2014
ERI 2014 - e-Infrastructures (different deadlines)	€ 82 million	02/09/2014
ERI 2014 - Support to Innovation, Human resources, Policy and International cooperation (different deadlines)	€ 20 million	02/09/2014

Industrial Leadership**ICT**

Call Title	Budget	Deadline
ICT 14-2014: Advanced 5G Network Infrastructure for the Future Internet	€ 125 million	25/11/2014
ICT 2014 - ICT 37 Open Disruptive innovation Scheme (SME Instrument) phase 1	€ 25,102 million	17/12/2014

Innovation in SMEs

Call Title	Budget	Deadline
INNOSUP-2014-5: Peer Learning of Innovation Agencies (Single Stage)	€ 420,00	16/12/2014

Nanotechnologies materials, biotechnologies, manufacturing

Call Title	Budget	Deadline
NMP+B 2014 - Factories of the Future	€ 145 million	09/12/2014
NMP+B 2014 - Energy-Efficient Buildings	€ 64 million	09/12/2014
NMP+B 2014 - Spire	€ 77 million	09/12/2014

Space

Call Title	Budget	Deadline
Space 2015: Protection of European Assets in and From Space	€ 6.5 million	27/11/2014
Space 2015: Earth Observation	€26 million	27/11/2014
Space 2015: Competitiveness of the European Space Sector: Technology and Science	€36.5 million	27/11/2014

Science with and for society**Science with and for society**

Call Title	Budget	Deadline
Science with and for Society - Integrating Society in Science and Innovation	€ 10,3 million	02/10/2014
Science with and for Society - Making Science education and careers attractive for young people	€ 12,2 million	02/10/2014
Science with and for Society - Promoting gender equality in research and innovation	€ 9,5 million	02/10/2014
Science with and for society 2014 - DEVELOPING GOVERNANCE FOR THE ADVANCEMENT OF RESPONSIBLE RESEARCH AND INNOVATION	€8,300,000 million	02/10/2014

Spreading Excellence and Widening Participation**Spreading Excellence and Widening Participation**

Call Title	Budget	Deadline
WIDESPREAD-2014-1 TEAMING	€11,850 million	17/09/2014
WIDESPREAD-2014-2 ERA Chairs	€ 33,600,000	15/10/2014

Euratom

Call Title	Budget	Deadline
EURATOM - Fission	€87.870 million	17/09/2014

Ricerche Partner per Bandi Europei

FONTI: ENTERPRISE EUROPE NETWORK

AGROFOOD

1) Partner search H2020-SFS-2015-2: Sustainable Food Security. Looking for experts in metabolomics and nanotechnology, livestock farmers (SMEs) and certifying companies (Ref. RDES20140428001)

A Spanish University research group is coordinating a proposal focused on animal welfare under the call H2020-SFS-2015-2. They are seeking for experts in metabolomics and nanotechnology, as well as SMEs working on extensive livestock farming to develop new methods of assessing and improving animal welfare. Deadline for call: 24 Febbraio 2015

AUTOMATION, ROBOTICS CONTROL SYSTEMS

2) PS: WIDESPREAD-2014-1 TEAMING - Twinning between a Bulgarian and Western Centres of Excellence in Mechatronics and Machine Building (Ref. RDBG20140228001)

A Bulgarian laboratory on Computer Aided Design and Manufacturing, at a leading Bulgarian university is preparing a proposal for the Horizon 2020 WIDESPREAD-2014-1 TEAMING call. The project aims to develop a long term cooperation between a Centre of Excellence in Mechatronics or Machine Building from a western country and the Bulgarian laboratory in order to establish such a centre in Bulgaria. The Bulgarian partner require a Center of Excellence on Mechatronics to complete the consortium. Deadline for call: 17 Settembre 2014

COMMUNICATION TECHNOLOGIES

3) H2020-DRS- 18-2014 Interoperable next generation of broadband radio communication system for public safety and security - Pre-commercial Procurement (PcP) (Ref. RDES20140408001)

Spanish mobile data related solutions company is setting up a proposal to be presented under the H2020-DRS-2014 Communication technologies and interoperability topic. The main goal is to an EU interoperable broadband radio communication system for public safety and security over the next 15 years. The consortium includes police forces, security forces, telecommunications companies and public bodies. Consortium coordinator is sought in order to submit the proposal. Deadline for call: 28 Agosto 2014

CREATIVE INDUSTRIES

4) H2020: CANVAS - A collaborative toolkit of emerging and social media technologies (Ref. RDGR20140507001)

Greek company active in web and mobile development is looking for a research institute and an SME in the field of creative industries as partners to submit a proposal under the topic "Technologies for creative industries, social media and convergence". The project aims to develop a new toolkit to address the needs of different sectors of the creative industries, such as design and digital media, digital communication channels, branding, digital signage and architecture. Deadline for call: 14 Aprile 2015

ENERGY

5) Partner Search - H2020 - EeB-07-2015: New tools and methodologies to reduce the gap between predicted and actual energy performances at the level of buildings and blocks of buildings (Ref. RDUK20140205003)

The monitoring of real energy use in energy-efficient buildings frequently shows major differences with respect to the predicted performance. This is even worse if a set of interacting buildings is considered. It is therefore important to capture the real complexities of the energy performance of the actual buildings and districts. In addition, effective methodologies for the correct understanding of user behaviour need to be addressed. The UK based University now seeks research cooperation. Deadline for call: 9 Dicembre 2014

6) H2020 EeB-05-2015: Innovative design tools for refurbishing of buildings at district level - Partner Search (Ref. RDUK20140205001)

A UK based University is leading a project to develop an Indicator System that will inform the choice of Intelligent Building Technologies used especially for building refurbishments based on their corresponding sustainability value in terms of energy efficiency, cost reduction and user comfort. The indicator system should evaluate both Building Intelligence and Sustainability in existing buildings. They now seek technical and research cooperation with clients experienced in this field. Deadline for call: 9 Dicembre 2014

7) SIE-01-2014-1 - Stimulating the innovation potential of SMEs for a low carbon energy system (Ref. RDUK20140416001)

A UK based registered Mutual engaged in developing low carbon projects for and with local communities is seeking SMEs and community based groups for SME Instrument project origination and delivery in the areas of housing newbuild or retrofit, commercial buildings retrofit, building mounted renewables, community/development scale renewables, mini grids, energy storage or low carbon vehicles. The aim is to develop and finance pilot projects using innovative financing mechanisms.

8) H2020 DS-06-2014 : industrial end-users from energy or connected vehicles looked for, to test innovative solutions against cybersecurity threats and incidents (Ref. RDFR20140528001)

A consortium of partners led by an international group is preparing a H2020 project on cybersecurity. The proposal aims at developing a set of processes and pluggable tools for operators and suppliers of large IT-infrastructures to identify and control risk on the business side and increase automation. The coordinator is looking for partners from Eastern or Southern Europe positioned on energy market or connected vehicles, to provide requirements and use cases in order to validate the solutions. . Deadline for call: 28 Agosto 2014

HEALTH

9) PS- H2020-PHC-2015-Transmembrane anion transporters as new chemotherapeutics for the treatment of cystic fibrosis and related conditions (Ref. RDES20140505001)

A Spanish research university group is looking for partners in order to submit a proposal to H2020-PHC-2015-two-stage call. The aim of the project is to explore the therapeutic potential in the treatment of cystic fibrosis of small synthetic molecules capable of promoting transmembrane transport of anions such as chloride and bicarbonate, which have been developed by this group. Different kinds of partners with expertise in early drug discovery to further explore this idea are sought. Deadline for call: 14 Ottobre 2014

10) H2020 - Personalizing Health & Care : Computational chemistry to find and optimize innovative molecule candidates for new therapeutic and diagnostic solutions (Ref. RDFR20140505001)

A French SME, specialized in molecular modelling and chemo-informatic, has developed innovative computing solutions to support, improve, and accelerate the early stage of therapeutic and diagnostic researches. They are searching for a coordinator for a H2020 Personalizing Health & Care project whose aim is to develop innovative molecule candidates to new therapeutic and diagnostic solutions. Deadline for call: 14 Ottobre 2014

11) H2020 NMP-25-2014-1: Partners sought for upscaling of manufacturing process and testing of innovative treatment for Excema and other skin disorders (Ref. RDUK20140318001)

An SME in North East England with 20 years' experience in the field of clinical aromatherapy is seeking partners to work on a collaborative project to test and market an innovative cream to treat eczema. Currently the draft of the proposal is at an advanced stage but it will require appropriate input from the new partners in order to ensure completion. Two partners are sought who will have specialised expertise in process scale-up and clinical test experience respectively. Deadline for call: 9 Ottobre 2014

ICT - SECURITY

12) H2020: Notification of citizens and authorities about local incidents through social media (Ref. RDGR20140204003)

A Greek SME active in ICT sector is interested in submitting a project under the call FCT-10-2014. The project aims to implement an urban security platform through which authorities will post customized alerts to social media whereas citizens will report significant incidents that they witness. Partners involved in urban security are sought (i.e. police) and experts in software for extracting patterns from images/videos. Deadline for call: 28 Agosto 2014

13) H2020-FCT-14-2014: Factors and behaviors affecting the citizens collaboration with european police forces through a cybercommunity application platform (Ref. RDES20140529001)

A Spanish research centre dedicated to security and crime prevention is drafting the project TRUFFAUT. The aim is to design a webapp or virtual platform to improve the cooperation between police forces and European citizens in the fight against crime. This goal is going to be achieved by designing this website according to the results of a previous empiric and interdisciplinary study about factors involved in citizen participation. The consortium is seeking for a coordinator and end-users. Deadline for call: 28 Agosto 2014

MATERIAL

14) H2020-FETOPEN-2014-2015-1 Novel ideas for radically new technologies – Natural rubber based films with antimicrobial and antifouling properties (RDFR20140228001)

A French Institute, acting in the synthesis of natural rubber based films, searches partners for FETOPEN-2014-2015-1 project. The project deals with new films, based on a natural resource, which have shown both antimicrobial than marine antifouling properties. Industrial partners are sought for applications of these surfaces both in the medical field (objects used in the hospital in contact with patients and nurses) or devices used in underwater conditions, such as biosensors or tubing. Deadline for call: 30 Settembre 2014

15) FP7: Hybrid composites: Road safety barriers from polymer hybrid composite material (Ref. RDLV20140522001)

An SME from Latvia is preparing a project pre-proposal for the M-era.Net 2014 Call – in the thematic area "Hybrid composites". The project objective will be to develop technology for production of road safety barriers from polymer hybrid composite material. The company is searching partners from R&D institutions and industry. The eventual roles of partners in the project – testing the mechanical properties of road barriers, joint R&D, testing/certification, implementation of the technology. Deadline for call: 31 Dicembre 2014

MOBILITY, TRANSPORT

16) Electric Mobility in Norway is looking for partners to "Green vehicle 2014" call. H2020-GV-2014 (Ref.RDNO20131128001)

The Client is a Norwegian industry cluster that cooperates and explores business opportunities within the electric vehicle market. The cluster are looking for international cooperation and are seeking partners for common projects. One actual arena is Horizon 2020 and "Green Vehicle 2014". The Cluster is currently establishing a test site to acquire knowledge and develop solutions to support electric mobility and where solutions can be tested in real-life settings. Deadline for call: 28 Agosto 2014

17) H2020 – GV-3-2014 - A new approach of Hydro mechanical CVT (continuously variable transmission) (Ref. RDIL20140323001)

An Israeli SME is interested to submit a project for topic GV-3-2014 in H2020. The company has developed a Hydro Mechanical Semi Continuously Variable Transmission (HK-CVT) based on a new concept of manipulating hydraulic elements to control the flow capacity of pump and motor, the invention increases the total engine efficacy (mechanical and volumetric). The Company is looking for research partners to build a consortium. Deadline for call: 28 Agosto 2014

18) Horizon 2020 call SCC1 partner search: Creation of integrated mobility environment (lighthouse project) using Mass Transit, Electric Vehicles (bikes and/or small four-wheelers), Photovoltaic generation and Smartphones. (Ref. RDGR20140228001)

The project proposed shall allow commuters of the greater Athens area to use the sub-urban railway and other mass transport media and shared electric vehicles (two or four wheelers) to reach their destination in the centre of the city using minimum footprint vehicles and producing zero emissions. Partners sought are other European cities interested in the lighthouse project and related technology providers. A proposal will be submitted under Horizon 2020 SCC-1-2015. Deadline for EoI's: 3/02/2015.

19) H2020: Next Generation Navigation System by exploiting real-time crowdsourcing of transport and sensory data (Ref. RDGR20140506002)

Greek company active in environmental consulting and IT services is looking for partners (research institute, SME and Municipality), in order to submit a proposal under the H2020 Mobility for Growth (MG) topic: Demonstrating and testing innovative solutions for cleaner and better urban transport and mobility. The project aims to demonstrate under real-life conditions an innovative mobility solution for environmentally-aware mobility management, by exploiting real-time crowdsourcing of transport. Deadline for call: 31 Marzo 2015

20) H2020 – GV-3-2014 - A new approach of Hydro mechanical CVT (continuously variable transmission) (Ref. RDIL20140323001)

An Israeli SME is interested to submit a project for topic GV-3-2014 in H2020. The company has developed a Hydro Mechanical Semi Continuously Variable Transmission (HK-CVT) based on a new concept of manipulating hydraulic elements to control the flow capacity of pump and motor, the invention increases the total engine efficacy (mechanical and volumetric). The Company is looking for research partners to build a consortium. Deadline for call: 28 Agosto 2014

WATER TREATMENT

21) PS: H2020 WATER-2015-DRYWATER – Dry anaerobic digestion of Waste Water Treatment Plants sludge. (Ref. RDES20140218001)

A Spanish company is looking for partners in order to submit a proposal for H2020-WATER-1-2015-two-stage call. The main goal of this project is to develop a dry anaerobic digestion of sludge from waste water treatment plants to achieve a "pathogen free" sludge that might be a high quality fertilizer, while increasing the biogas production. Partners with experience in autotrophic nitrogen removal, biogas and processes control are sought. A coordinator is also needed. Deadline for call: 16 Ottobre 2014

Ricerche di Partner Tecnologici e Commerciali

Profili di ricerca/offerta di nuove tecnologie

Presentiamo di seguito alcuni profili di ricerca/offerta di nuove tecnologie di recente inserimento nella banca dati della rete **Enterprise Europe Network**:

Richieste di tecnologia

1) Expertise in Internet of Things (IoT), Cloud Technologies, Operational Intelligence & Predictive Analytics is sought (Ref. TRIN20140330001)

An Indian company aims to develop information systems to address problems of increasing energy consumption, energy costs & environment related risks. The Company has pioneered in energy & environment management software for data centers and critical facilities. It is focusing on augmenting energy efficiency, gas emissions, water and waste management. With a view to develop this expertise in Internet of Things (IoT), Cloud Technologies, Operational Intelligence & Predictive Analytics is sought.

2) Automated packaging line for steel sheets requie (Ref. TRAT20140428001)

An Austrian SME wants to invest in an automated steel sheet packaging line. They own a patent of a specific packaging method which has to be lifted from a manual to an automated work-flow. This method enables protective enclosing of metal sheets and to open and re-seal the package without additional efforts. They look for partners with expert knowledge of automating packaging processes. Developing and drawing this packaging line is the first task. Second task is the installation in a next step.

3) Polish company looks for a supplier of sapphire coating on the 32" glass (Ref. TRPL20140331002)

Polish company specialized on building high performance electronic appliances is searching for a partner / supplier who will deliver sapphire coating on 32" glass. The company is also interested in cooperation with a company who can offer a comparable protective coating made of any other optional material - required transparency should be at least 90%. A company is sought for a commercial agreement with technical assistance or technical cooperation in case of specific adaptation.

4) High Temperature Foil / Membrane Required to Laminate to Insulation Materials (Ref. TRUK20140422001)

A Scottish materials supplier to multiple industries is seeking a number of high temperature foils or membranes to laminate to their existing range of insulation materials. Ideally any potential solution should be flexible and preferably carry CE marking with independent test data and ISO certification. Commercial agreements with technical assistance, technical cooperation and licensing agreements will be considered.

5) Production of juice or smoothies from kale, carrot and other vegetables. (Ref. TRNO20140402001)

A small Norwegian company growing vegetables requests know-how or equipment regarding production of juice or smoothie from kale and/or carrot in a small scale production plant. Pressing kale into quality juice/smoothie is the main challenge. Pressing of kale is today unknown. The equipment for juice production must be suitable for a small scale company, satisfactorily hygienic and approved for food production. The client is interested in collaboration with companies, R&D and equipment vendors.

6) Anti-pilling finishing technology for felted composite material (Ref. TREE20140416001)

An Estonian handicraft company that produces woolen textile products (coats, jackets and scarves) is looking for partners (private companies, research groups, universities) who are able to offer finishing technology that helps to avoid or minimize pilling of felted composite material. Products are made from composite material produced by felting wool with various materials such as lace or silk. The company is open for service agreements and joint venture.

7) Seeking technology for adding value to municipal waste water sludge (Ref. TRRO20140212002)

A Romanian company with activities in waste management is seeking novel or new technology for adding value to municipal waste water sludge. The company is interested in technical cooperation or research cooperation agreements.

8) Innovative small device and sensor technology suitable for the design and development of mobile, personalised kits based on open Hardware (HW) (Ref. TRGR20140508001)

Greek company with expertise in software (SW) development for web and mobile application is looking for an innovative small personal device or sensor technology, based on open hardware (HW) solutions (like Arduino or Raspberry pi), that could be used in conjunction with mobile HW kits and other development platforms. The company is looking for a manufacturer of small devices and sensors in order to conclude a technical cooperation agreement or a commercial agreement with technical assistance.

Offerte di tecnologia

9) Coating system for all materials with atmospheric pressure plasma (Ref. TOAT20140429001)

An Austrian SME developed a system to use atmospheric pressure plasma to coat all kinds of materials (even paper, glass, and plastic foils, etc). Deposition of different metals, ceramics or silicium layers on the surface adds new features to existing materials in terms of adhesion, conduction or corrosion properties and thermal stability. Partners are sought to develop final products and new applications and to spread the technology.

10) Innovative chitosan-based biomimetic scaffold for wound repair and tissue engineering (Ref. 12 BE 0324 30HZ)

A research team of a Belgian University has developed a tridimensional-layered chitosan scaffold. This scaffold offers potential applications in wound repair, tissue engineering.

The research team is looking for collaboration with companies for testing , in vivo evaluation, licence agreement and technical cooperation agreement

11) Recycling of drilling emulsions and lubricants (Ref. TODE20140417003)

A German SME, active in the machine tools area, has developed a technology for on-site recycling of drilling emulsions and lubricants from metal processing. The separation of lubricants, emulsions, chips and metal sludge, respectively, is achieved by using a mobile, low-weight separator equipped with skimmers and pumps. The SME seeks partners from the industry for a license agreement, Commercial agreements with technical assistance, manufacturing agreement or a technical cooperation agreement.

12) Formable light weight metal sandwich material using steel, aluminum, stainless steel, etc. is offered by a Swedish SME. (Ref. TOSE20140511001)

A Swedish SME has developed a light, thin and formable metal sandwich. Products made from sheets of metals can by this solution be lighter. The weight of solid can be reduced with 50 %, still with the bending stiffness intact. A benefit compared to other sandwich materials is that this solution can be processed in conventional metal forming methods and tools.

The company is searching for partners that would like to set up a manufacturing, subcontracting or technical cooperation agreement.

13) Research group with ultra miniature force/moment sensor with large range interested to find partners in packaging and production (Ref. TONL20140523003)

A Dutch research group from a technical university with strong knowledge of MEMS (Micro Electro Mechanical Systems), has developed a new and innovative ultra miniature force sensor capable of measuring 6 axes (three forces and three moments). Currently the force range is 60 N in normal direction and ± 30 N in shear direction. The sensor is worldwide the smallest force-torque sensor in its range. The involved researchers are looking for a company for packaging and producing of this sensor.

14) Modular design of rigs' drilling tools (Ref. TOMK20140325001)

A Macedonian inventor offers an improved and more cost effective solution for rigs' drilling tools (pipe and stabilizer). The solution is based on an innovative modular design of the tools that enables less manufacturing and operational costs as well as improved technical properties. The inventor is searching for producers, research organizations and engineering

companies for technical cooperation, manufacturing agreement, commercial agreement with technical assistance or license agreement.

15) New innovative materials based on glass and carbon fibres. (Ref. 11 LT 57AB 3N3M)

Lithuanian SME offers a technology for the material manufacturing of glass and carbon fibres. Both materials have unique characteristics such as lightness and mechanical resistance thanks to these characteristics they could replace the use of metal. Company is looking for partners for further development of the technology for specific markets and market introduction.

16) Innovative solutions for 3D photography for SLR cameras lenses, hardware and software (Ref. TOIS20140502001)

An Icelandic SME has designed and developed Innovative device and software to be used with normal SLR cameras for 3D photography and cinematography. The company is looking for commercial agreement with technical assistance, joint venture-, licensing-, or technological cooperation agreement.

Offerte e richieste di collaborazioni commerciali

Presentiamo di seguito alcuni profili di ricerca/offerta di collaborazioni commerciali di recente inserimento nella banca dati di **Enterprise Europe Network**:

1) A Polish company is willing to become a distributor of photovoltaic modules.(Ref. BRPL20140409003)

This Polish company offers sale and assembly of PV modules and other related equipment. The company is looking for manufacturers of grid-tie solar systems and off-grid stand alone systems in order to introduce these products on the Polish market.

2) Polish distributor of wastewater treatment equipment (Ref. BRPL20140418001)
